SUMMARY

Finance professional with 9 years of experience in FP&A, business controlling, and auditing in multinational companies. Packed with expertise in financial modeling, forecasting, and variance analysis. Enhanced by skills in Data Science and Artificial Intelligence. Passionate about bringing data-driven solutions for insightful decision making.

PROFESSIONAL EXPERIENCE

Senior Business Unit Controller

09/2022 – 08/2024

DCH Auriga 🌐

Bangkok, Thailand

- Reinvented the new feasibility model using both ongoing financial and operational data to help the management evaluate the deal's value much more precisely. This helps the executives win a couple of million dollar deals.
- Introduced new financial metrics to help the management monitor the company's financial performance more insightfully.
- Performed monthly recurring tasks involved with the data analysis from both operations and finance sites. Reinvented spreadsheet to reduce recurring tasks from week-long to just a few days.
- Assisted FP&A Manager to forecast the company's financial performance.

Freelance Accountant

09/2021 – 12/2023

Self-Employed 🌐

Bangkok, Thailand

- Handled and maintained all clients' financial transactions including accounts receivable, accounts payable, and general ledger using accounting software.
- Executed monthly and annual financial closings, generating the financial and performance reports for clients' executives.
- Ensure adherence to all relevant tax regulations, assisting with the preparation of necessary tax filings and documentation.
- Perform regular bank and account reconciliation and provide documentation and support during audits.

Audit Senior

09/2015 – 09/2020

Deloitte 🌐

Bangkok, Thailand

- Analyzed clients' financial transaction with data mining techniques to identify fraudulent-suspected transactions and patterns.
- Worked with Advisory team to develop the new financial model using clients' financial and operational data. Delivered the model used for new regulation compliance.
- Identify gaps and risks in client's business cycles through thorough process inspection, then make a suggestion to the executives for improvement.
- Supervised junior auditors to perform the assigned tasks.

EDUCATION

Master of Science (M.Sc.) - Data Science

University of Europe for Applied Sciences [ℹ](#)

2024 – 2026

Potsdam, Germany

This program brings up the detail from the different stages of data lifecycle from understanding business problems, design and implement data pipelines, analyze the data, visualize the data, to apps deployment via cloud computing.
